

**New England
Donor Services**
Organ and Tissue Donation

High School Class Presentation

New England Donor Services (NEDS) is a leading nonprofit organization that coordinates organ and tissue donation in the New England states and Bermuda. Our mission is to save and heal lives through organ and tissue donation, and provide education.

Our Youth Program

High School students are at an age when many will apply for their driver's license. We provide facts and statistics on donation, and discuss myths and misconceptions, so that students are prepared to make their decision when asked at the motor vehicle office if they want to register to be a donor.

What we offer

Our presentations are completely FREE. Additionally, we provide free promotional items ("swag") for students and teachers.

Our Speakers

Our speakers are trained instructors who work at NEDS. There are times when we bring an additional guest speaker who are clinicians or surgical coordinators, or volunteers who have personally experienced donation.

Our Presentation

We provide a PowerPoint presentation and videos that can fit into a 30, 45, 60 minute, or longer class period or assembly. We speak to health, science, driver education classes and more!
